NOTES
- Images were cropped to remove the sidebar, minimap, status bar and other unneeded screen parts.
- In image 03 and 09 a thin strip with the file tab/breadcrumb is joined above the code lines so the file name stays visible.

- In image 10 an earlier "file not found: Rails.java" attempt was trimmed out; only the successful compile and run is kept.
- Compile/run commands:
    Program 1: cd TransactionProject
               javac -d . transaction/Account.java reports/TransactionReport.java MainApplication.java
               java MainApplication
    Program 2: javac Rails.java then java Rails
    Program 3: javac Divide.java then java Divide
